Explanation of symbols used

2. Safety measures

The controller has been manufactured in line with the government decrees and Czech standards harmonized with the EU regulations mentioned in the manufacturer's declaration of conformity.

The above mentioned product complies with the following standards:

ČSN EN 60335-1 ed.3 ČSN EN 60335-2-30 ed. 3

ČSN EN IEC 61000-6-2 ed. 4

ČSN EN 61000-6-3 ed. 2

The above mentioned product complies with the following directives:

- Directive 2009/125/EC of the European Parliament and of the Council establishing a framework for the setting of eco-design requirements for energy-related products.
 - Government Decree No. 118/2016 Coll. Directive 2014/35/EU of the European Parliament and of the Council on the harmonisation of the laws of the Member States relating to the making available on the market of electrical equipment designed for use within certain voltage limits.
 - Government Decree No. 117/2016 Coll. Directive 2014/30/EU of the European Parliament and of the Council on the harmonisation of the laws of the Member States relating to electromagnetic compatibility.
 - Government Decree No. 481/2012 Coll. (Regulation of the European Parliament and of the Council No. 2014/35/EU, Regulation of the European Parliament and of the Council No. 2011/65/EU).
 - Government Decree on restriction the use of some hazardous materials found in electrical and electronic products.

Observe generally applicable national provisions and other related regulations. Unplug the unit from mains before any service intervention. Connection and earthing of the electric device or components thereof must be in line with laws applicable in the country of use. Only qualified staff may carry out any electric service works.

- Observe applicable laws, in particular:
- on safety of electric and thermal appliances,
 - on central heat distribution systems,
 - on fire safety.

3. Description of the controller

- 3-level controller for fan revolution control for Stavoklima industrial curtains,
- 0-1-2-3 revolutions switch,
- designed for devices with 230V AC fans,
- electric components for curtain control with accessories housed in full-metal sheet cabinet with ventilation holes,
- fitted with circuit breakers and performance components,
- ready for control by 24V door contact (potential-free contact),
- anti-freeze protection input,
- output for control of electrothermic 2-way or 3-way "NO" valve,
- ready for possible connection of a spatial thermostat,
- output for a circulating pump control connection of max 6A/230V,
- input for automatic operation contact,
- curtain fan rundown with optional additional configuration 0.5s – 10H,
- built-in electrical fuse,
- the controller designed for control by external LS-AX 03 control.

The ROJ-series controllers allow for connection of multiple air curtains. The selection of an appropriate controller type must consider the power input of the unit, or sum of power input of curtains in chain (output power limitation in "A").

The **ROJ 14-21** and **ROJ 30-21** series controller have failure-operation function in addition.

Type of control	ROJ 14-20	ROJ 14-21	ROJ 30-20	ROJ 30-21
Unit power supply	230V		230V	
Designed for max curtain(s) current	14 A		30 A	
Revolutions control levels	0-1-2-3		0-1-2-3	
IP rating	IP 20		IP 20	
Dimensions (length x width x height)	400 x 500 x 210		400 x 600 x 210	

4. Functions of the controller

- Lamp on – the device is powered.
- Switch in 0 position – the device is off.
- Switch in 1 position – revolutions speed level 1 enabled.
- Switch in 2 position – revolutions speed level 2 enabled.
- Switch in 3 position – revolutions speed level 3 enabled.

5. Operation of the controller

- When the lamp on the controller is on, the device is ready for operation.
- Set up the required fan revolution speed using the "0-1-2-3" speed switch.
- To turn the device off, set the switch to "0" position.
- In the event of a sudden power failure, the air curtain will restart in the mode set on the controller when power is restored.
- Max surrounding temperature 40 °C.
- Designed for industrial environment.

Before any work with the unit, disconnect the electric power supply, mains supply for the unit. Electric shock hazard!

6. Fan rundown time setting

- Rundown time = coefficient x range (e.g., 30s = 0.5 x 1min)

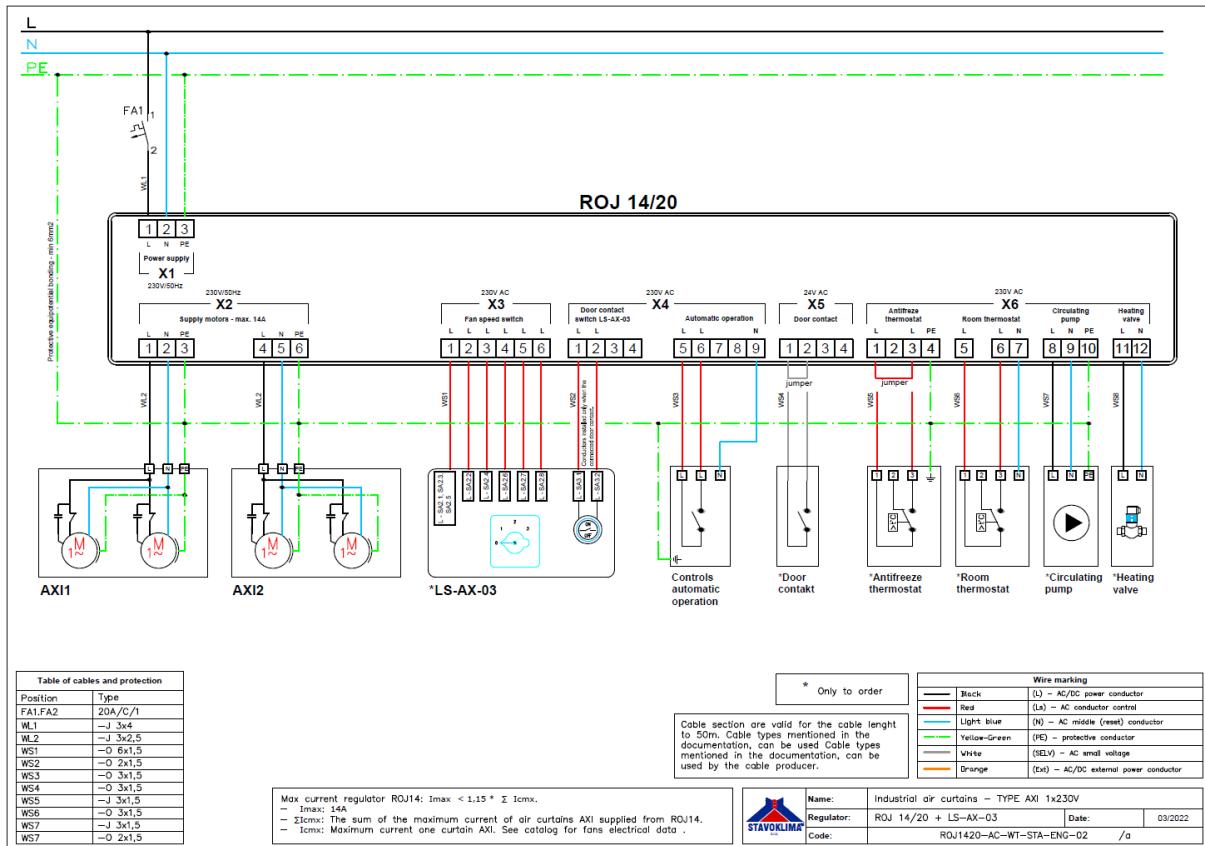

Coefficien

Range (seconds "s", minutes "m", hours "h")

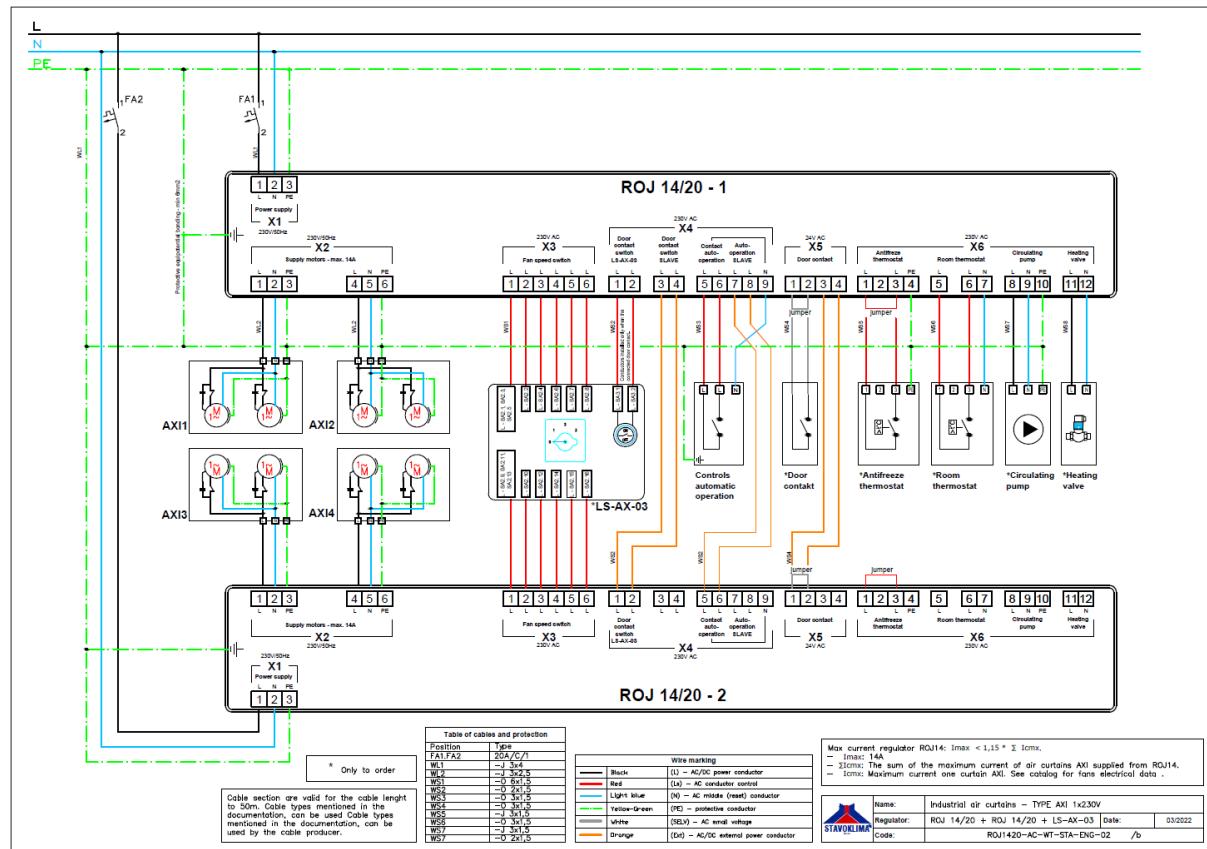

Do not change – Relay function setting must be "R"

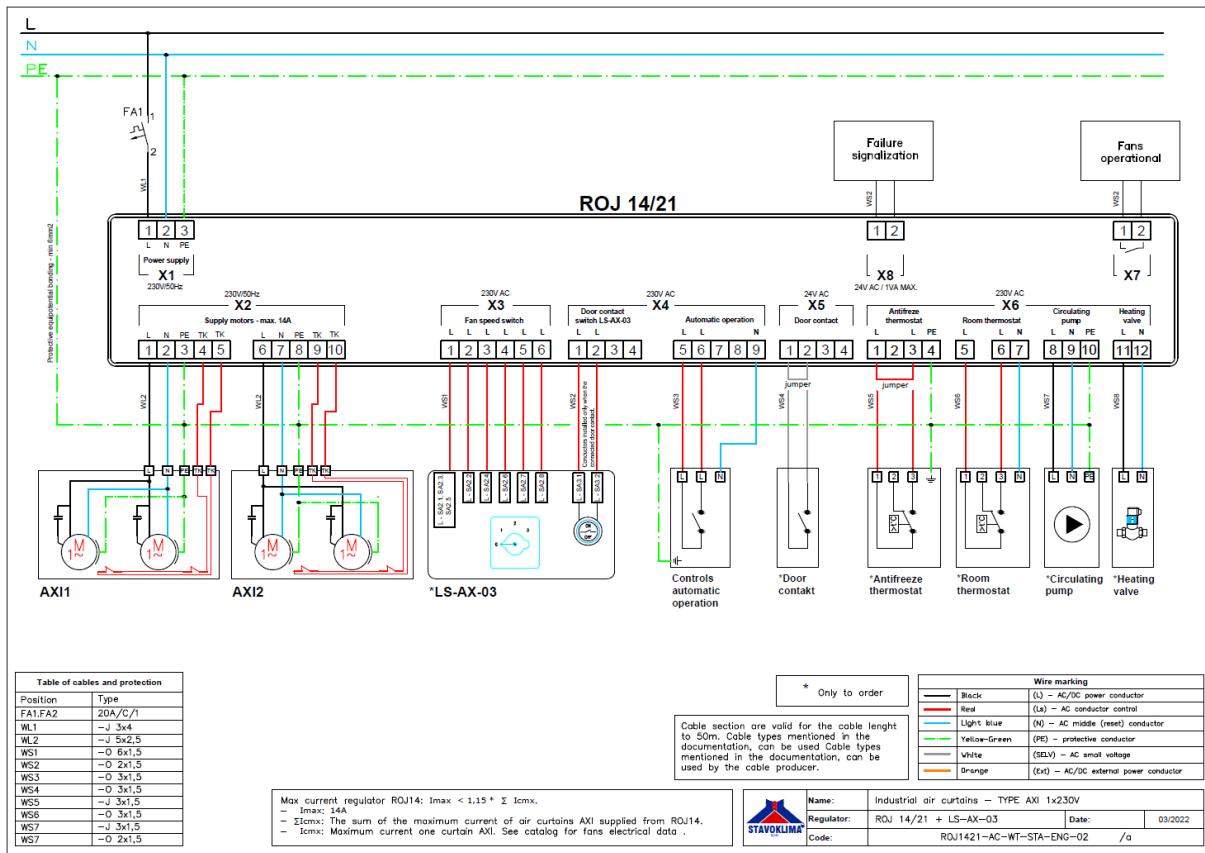

7. ROJ 14-20 AC controller connection scheme

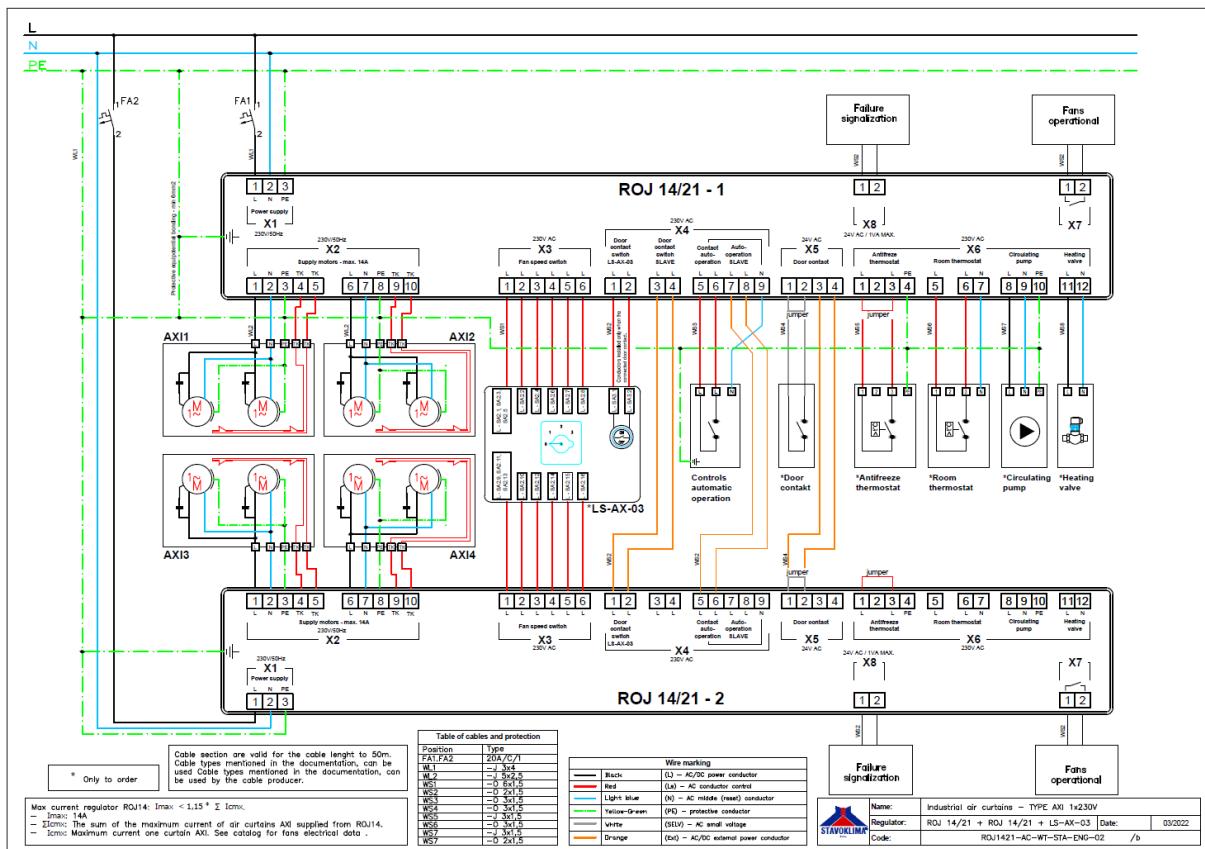

7.1. ROJ 14-20 AC controller chain connection scheme

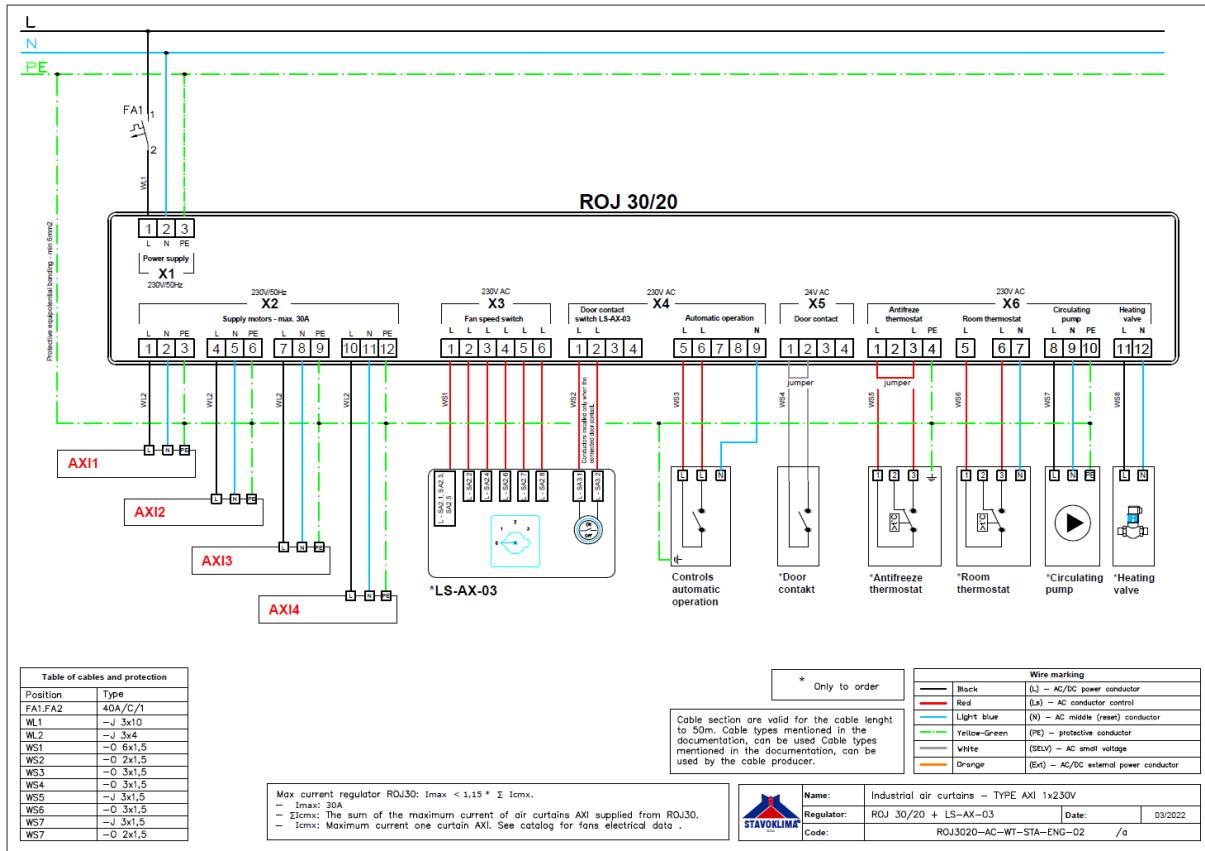

8. ROJ 14-21 AC controller connection scheme

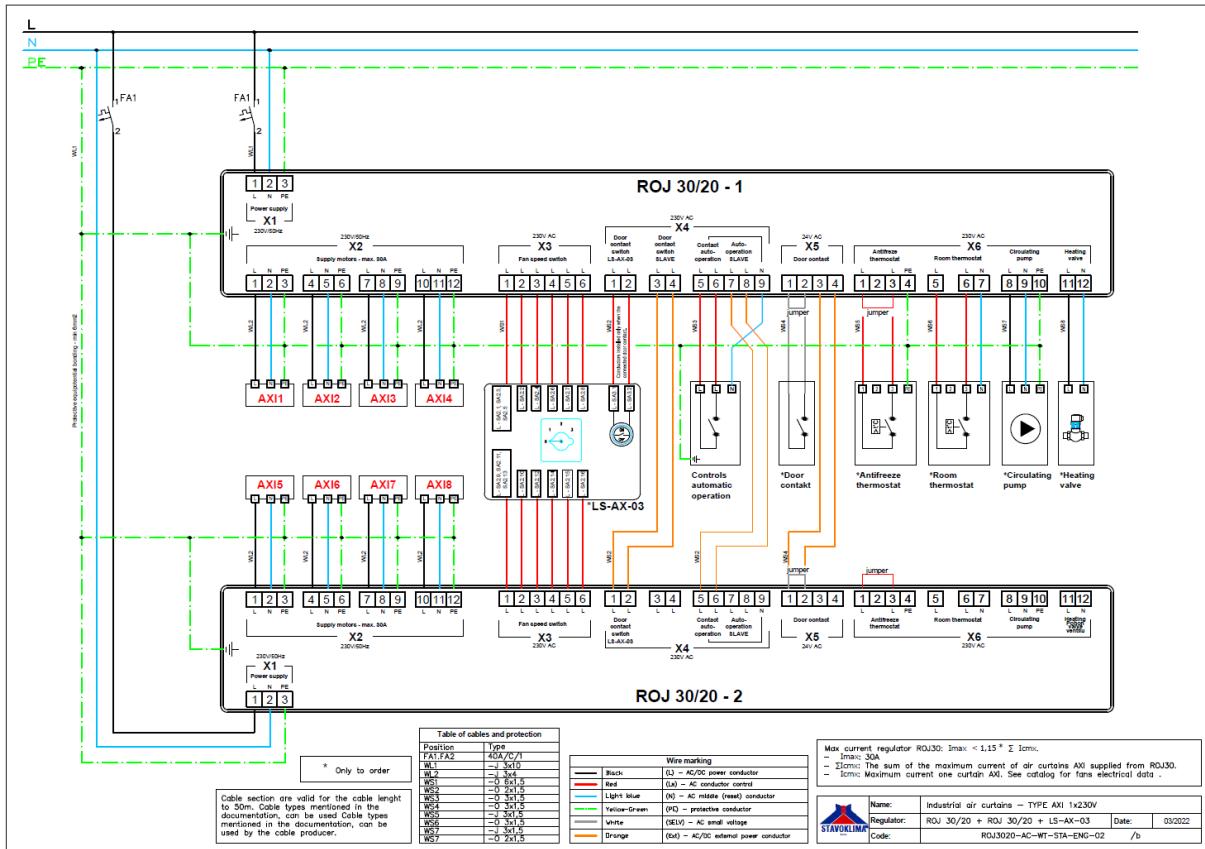

8.1. ROJ 14-21 AC controller chain connection scheme

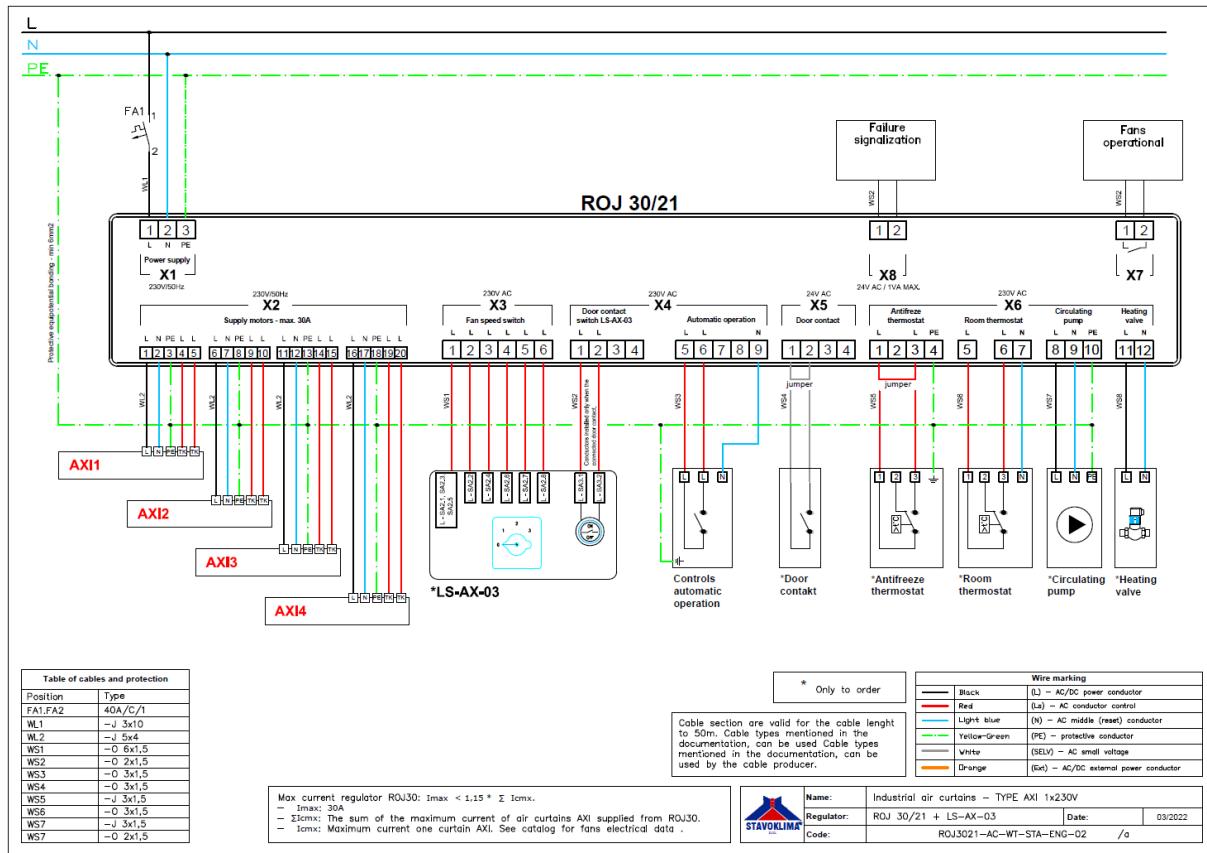

9. ROJ 30-20 AC controller connection scheme

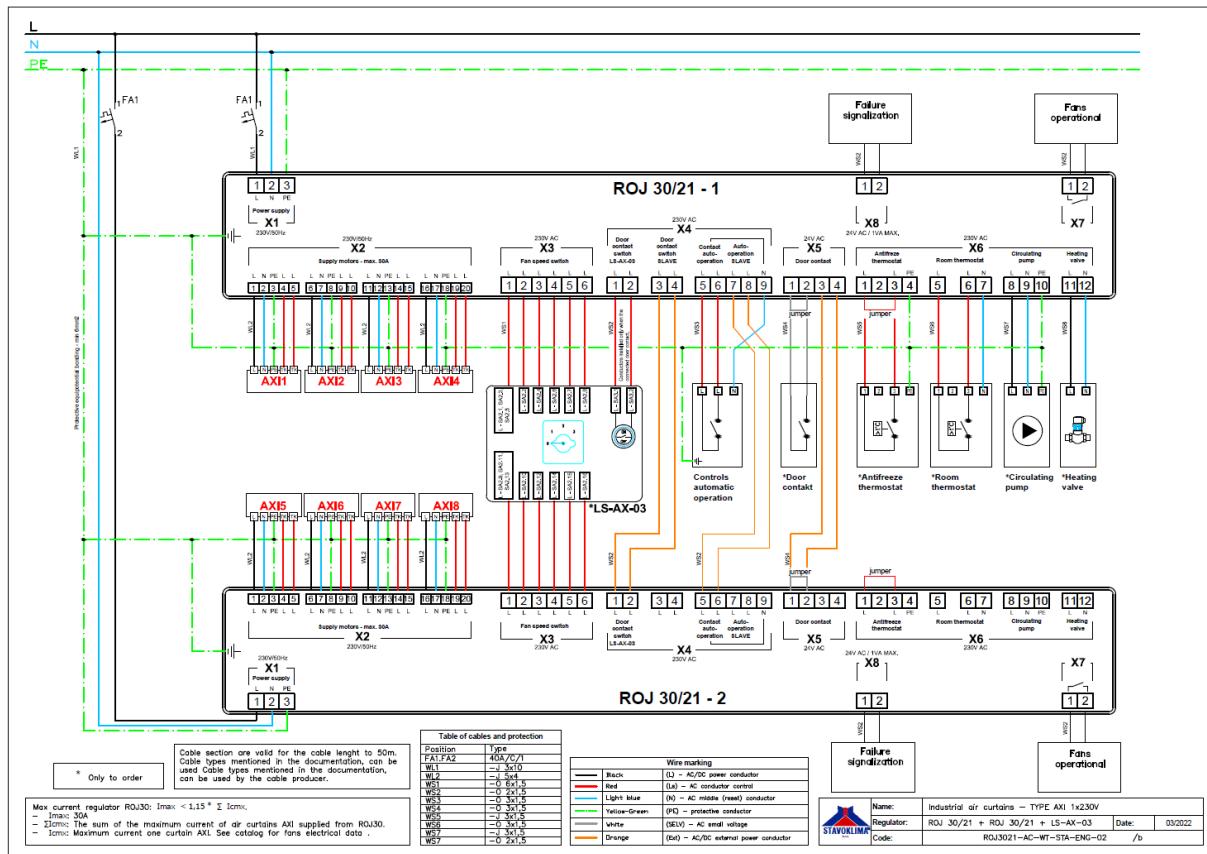

9.1. ROJ 30-20 AC controller chain connection scheme

10. ROJ 30-21 AC controller connection scheme

10.1. ROJ 30-21 AC controller chain connection scheme

11. Decommissioning – disposal

After the expiration of the service life, the controller must be disassembled and disposed of. Only qualified company may disassemble the device. The product or components thereof must be disposed in environmentally-friendly manner at the end of its service life.

The components of the unit must be separated and sorted out by type of material for disposal. Dispose of the metal and plastic components at your local collection yard. The transport packaging of the product is made of common recyclable material (paper, polyethylene, wood) and is labelled as such according to ČSN 77 0052-2.

As far as disposal is concerned, it is operator's responsibility to comply with applicable national provisions in the country of use. In addition, follow regulations and laws of your country applicable to waste disposal. Separated collection and recycling of the products may help to protect environment and human health.
